145G M10 TAPPED BEAM CLAMP WITH CONE POINT SET SCREW - SIZE CHART			
Size	Bag Qty	Pack Qty	Part No. - Ch. Accs.
NA	100		GB37

ABOUT THE PRODUCT

**Description:** *145g M10 TAPPED BEAM CLAMP* - The Channel Accessory range of bracketry products are manufactured in accordance with BS6946:1988. The brackets are designed and manufactured to primarily support and fix together Channel (Strut) lengths in a metal framework situation. All Channel (Strut) lengths are manufactured in accordance with BS6946:1988.

**Material:** Channel accessories and bracketry are predominantly made from Mild Steel material, in 6mm thick profile. Channel (Strut) lengths are manufactured from Pre Galvanised Steel to BS EN 10346: 2015 and are available in Standard gauge profile (2.5mm thickness) and also Light gauge profile (1.5mm thickness) and have either a Plain or Slotted option. (Slot sizes on Standard gauge are 28 x 14mm. Light gauge are 28 x 11mm).

**Finishes:** Channel Accessories and bracketry products are available with a Hot Dipped Galvanised finish. Channel (Strut) lengths are available in a Pre Galvanised finish. Both finishes are readily available from stock. Other finishes are available to order.

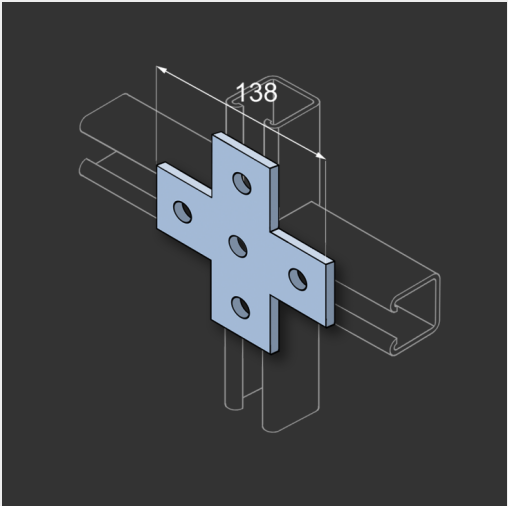

**Connections / Fixing Methods:** The range of Channel accessories and bracketry are predominantly pre drilled with 14mm fixing holes allowing the use of bolts and threaded rod to facilitate fixings.

**Country of Origin:** Channel accessories and bracketry are manufactured in India. Channel (Strut) lengths are manufactured in the UK.

## ABOUT THE PRODUCT

**Description:** *3x1 Hole 90 Degree Angle Bracket* - The Channel Accessory range of bracketry products are manufactured in accordance with BS6946:1988. The brackets are designed and manufactured to primarily support and fix together Channel (Strut) lengths in a metal framework situation. All Channel (Strut) lengths are manufactured in accordance with BS6946:1988.

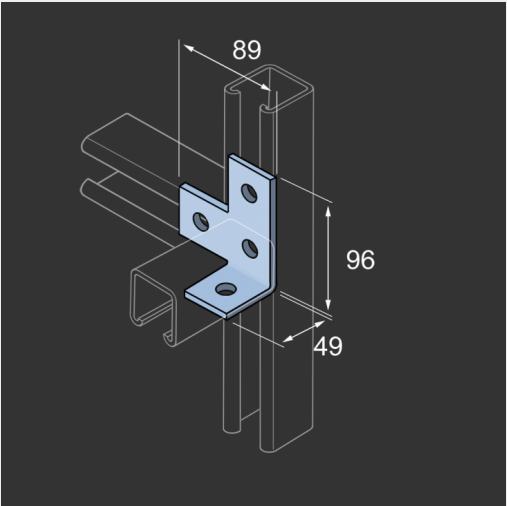

**Material:** Channel accessories and bracketry are predominantly made from Mild Steel material, in 6mm thick profile. Channel (Strut) lengths are manufactured from Pre Galvanised Steel to BS EN 10346: 2015 and are available in Standard gauge profile (2.5mm thickness) and also Light gauge profile (1.5mm thickness) and have either a Plain or Slotted option. (Slot sizes on Standard gauge are 28 x 14mm. Light gauge are 28 x 11mm).

**Finishes:** Channel Accessories and bracketry products are available with a Hot Dipped Galvanised finish. Channel (Strut) lengths are available in a Pre Galvanised finish. Both finishes are readily available from stock. Other finishes are available to order.

**Connections / Fixing Methods:** The range of Channel accessories and bracketry are predominantly pre drilled with 14mm fixing holes allowing the use of bolts and threaded rod to facilitate fixings.

**Country of Origin:** Channel accessories and bracketry are manufactured in India. Channel (Strut) lengths are manufactured in the UK.
